

22 October 1957

MEMORANDUM FOR: Chief, Intelligence School

SUBJECT : Weekly Activities Report #43
15 - 22 October

1. Management Special (SR). The first week of Management Special (SR) was completed on Friday, 18 October. Considerable readjustment of the schedule has been necessary since students and instructors alike have found the various discussion sessions to be highly productive and worthy of a greater expenditure of time than was originally anticipated. All major portions of the course will receive approximately equal attention, however, and the material which has been dropped is exclusively case study matter. This does not detract from the over-all effect of the course because the student body is willing and eager to discuss specific cases which have direct application to the work of the division. In most respects, this is more rewarding than the discussions of cases taken from industry or other governmental organizations. STAT

We were pleased to learn that [] C/SR has agreed to appear next Thursday morning to address his middle managers who are presently attending the course. STAT

2. Basic Management. Basic Management #38 opened on 21 October, with an enrollment of [] students. The guest speaker for the first session of the course was [] SSA/DDS. STAT

3. Basic Supervision. Basic Supervision #34 was completed on 18 October with [] members in attendance. It was an unusually volatile (sic) and enthusiastic group of supervisors at GS-9 and GS-11 level. STAT

Basic Supervision #35 (a presentation for GS 12-14 supervisors) begins on Monday, 28 October. This is the course that will run for 14 days instead of the usual 10. [] members are currently enrolled. STAT
